Furniture Trends Forecast + Marletex Fabric

If you have to sum up the hot furniture trends for this year and next – one word comes to mind – eclectic!

- **Metallic** are hot this year and it shows – furniture takes on a new finish with metallic's – out- glitzing the mirrored Hollywood Regency trend of last year.
- **Asian styles** that fell out of favor decades ago are taking a peek into rooms this year. Look for Japanese art inspired fabrics to start leading us down the path to a kinder, gentler Asian style in furniture.
- **Bright sofas** are front and center in living room furniture – out of the picture are neutral sofas with bright throw pillows, in the picture are bright sofas with neutral throw pillows.
- **Curvy couches** in heavier styles are often used in black and white decorated living rooms. Look for the couch to stick around when color hits the walls again.
- **Comfort and Joy** – Comfort keeps in the forefront for the year, thank goodness, and bright colored furniture will be all the rage.
